

# 13. CONFACTS GTM42

CIP Number: CREZ-GTM-13

**C2r Hook:**

*Every rivet in the Vavora has a patent number. Every whale has a PhD. This is the dossier they don't show the tourists.*

**Unique Proposition:**

Hard sci-fi footnotes as entertainment. CONFACTS is the "director's commentary" for the entire GTM track—three hours of NASA-sourced, blockchain-verified, peer-reviewed technical appendices disguised as television.

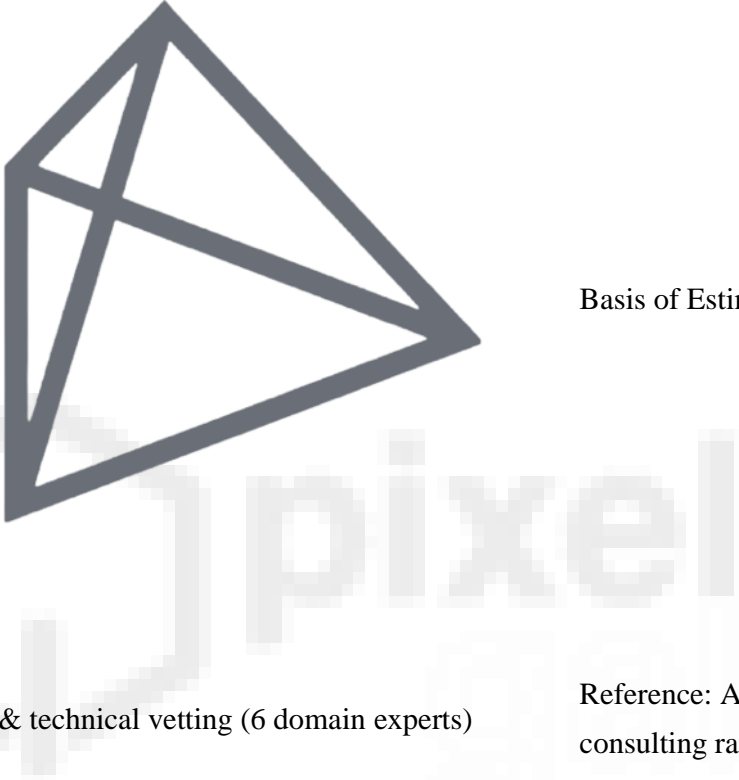

**Creative Inception:**

2020, pandemic lockdown. Tomar discovered that the most engaged viewers of his documentary *Philosophy and i Déjà vu* were not humanities students but IIT engineers—who paused to read the citations. CONFACTS was designed as a love letter to the Venn diagram intersection of *Star Trek* technical manuals and Upanishadic commentaries.

**Format:**

- Documentary series, 3 x 40 minutes
- Reference: *Tesla (2020)* [citation:TOC\_CREZ2.pdf]

**Cost Projection:**

Item	Basis of Estimate	Cost (USD)
Research & technical vetting (6 domain experts)	Reference: Academic consulting rates	210,000
Patent visualization graphics	Reference: <i>The Big Short</i> explanatory sequences	180,000
Blockchain integration for IP timestamping	Development estimate	120,000
<b>Total</b>		<b>510,000</b>

**Proposed Completion:** Q1 2027 – Q3 2027
