

64. RISE OF VVHOCTOPUS

CIP Number: CREZ-TAU-64

C2r Hook:

The whale remembered. The octopus coded. Together, they became WHOCTOPUS—the saffron consciousness that asks "WHO" before "HOW."

Unique Proposition:

The origin story of the Pixodus cosmology's central mentor figure. How Fidel the blue whale and an unnamed octopus merged consciousness to become the quantum-sentient threshold guardian of humanity's next evolutionary step.

Creative Inception:

Vancouver Aquarium, 2004. Tomar watched an octopus solve a puzzle box while a beluga whale observed from the adjacent tank. He spent twenty minutes convinced they were communicating. The aquarium staff assured him this was impossible. He has spent the twenty years since trying to prove them wrong.

Format:

- Documentary, 3 x 40 minutes
