

34. VEDAS TO STARS

CIP Number: CREZ-XLS-34

C2r Hook:

Before NASA, there was the Nasadiya Sukta. Before the Hubble Deep Field, there was "Ekam Sat, Vipra Bahudha Vadanti." This is the history of cosmic wonder—told by the civilization that invented zero.

Unique Proposition:

The first documentary to present Vedic cosmology as legitimate scientific inquiry rather than "ancient astronaut" pseudoscience. Rigorous, respectful, radical.

Creative Inception:

Vancouver Film School, 2003. A classmate asked Tomar: "What did your ancestors think about space?" He realized he didn't know. Twenty years of reading followed. Vedas to Stars is his examination paper.

Format:

- Documentary series, 3 x 40 minutes
- Reference: *Cosmos* (2014) [citation:TOC_CREZ2.pdf]

Cost Projection:

Item	Basis of Estimate	Cost (USD)
Sanskrit scholarship consultation	3 experts, 24 months	210,000
Astronomical visualization	Reference: <i>Cosmos</i> CGI standards	480,000
Global location shooting (Varanasi, Khajuraho, NASA)	Production estimate	390,000
Total		1,080,000

Proposed Completion: Q3 2026 – Q1 2027
